The SureColor SC-F2130 is the printer businesses need to produce quality prints directly onto garments. The SC-F2130 utilises high density ink to ensure vibrant and highly accurate colour transfer of designs onto white and even coloured fabrics.

Innovation In Printing

Epson develops innovations such as our PrecisionCore technology and UltraChrome Direct-To-Garment ink technology into our printer to deliver precision of the highest quality.

PrecisionCore Technology

Print graphics up to 1,440 x 720dpi for amazing quality that truly complements your design. The technology behind PrecisionCore encompasses a precise dot control to create images with outstanding clarity and sharpness on the garments.

Epson UltraChrome Direct-To-Garment Technology

Print directly onto fabric products with Epson UltraChrome DG ink to achieve accurate and bright colours with an outstanding finish. The ink has been specially formulated with high-dispersion ink technology that helps to reduce white ink sedimentation to give it a very natural white colour. The high-density ink allows prints to be of an unmatched stunning quality, even on coloured garments. The water-based pigment is durable and washable as prints achieved scores of 4.0 or higher on industry standard AATCC wash test and is certified to be safe for adults and children, including babies, in accordance with ECO PASSPORT by OEKO-TEX®.

Easy Garment Setting

The SC-F2130 is easy to operate with minimal training required for the user. Fabric is easily loaded onto the platen and the height adjustment allows easy garment loading and adjustments according to the different needs.

Adjustment With Frame Set

Press and smoothen out garment and attach the platen frame.

Adjust the platen height using the height adjustment lever.

Garment is ready to be printed on.

Adjustment With New Platen Grip Pad

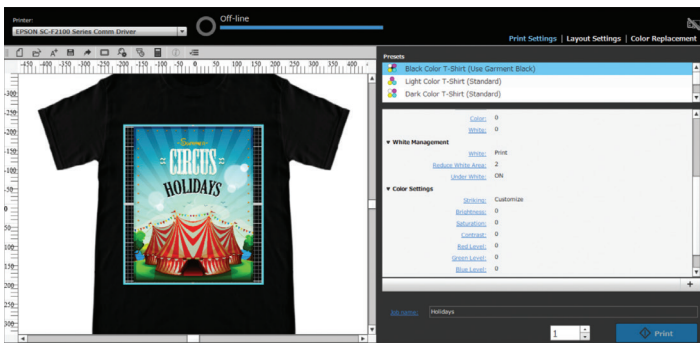

Press and smoothen out garment.

Adjust the platen height using the height adjustment.

Garment is ready to be printed on.

Intuitive Garment Creator Software

With Epson's intuitive Garment Creator software, it is easy for users to use and navigate through the interface to design, edit and customise designs for production. The software allows users to save their predefined colour management and layout controls to deliver consistently great results.

Trusted Reliability

Commercial-grade Reliability

All components on the SC-F2130 are designed and built by Epson to ensure that the technology works cohesively to produce exceptional prints time and time again. The PrecisionCore print chip is ideal for printing with direct-to-garment ink chemistry and it is co-developed with the Epson UltraChrome DG ink technology to achieve extreme reliability.

Maximise Uptime and Productivity

The SC-F2130 is equipped with an advanced automated maintenance design that includes the use of a cleaning cartridge that will automatically clean the printhead cap to ensure that it is perpetually clean. Meanwhile, the white ink circulation system comes with an inline white ink filter to ensure better performance and reliability.

Ink Circulation System

White ink

Pump

Head

The pump ensures constant circulation of the white ink inside the system.

Exceptional Productivity

Engineered to meet the needs of garment printing businesses, the SC-F2130 can print a t-shirt in just 9 seconds*, because of its PrecisionCore TFP printhead.

*Refers to head firing time when using dual colour mode, image size is 10" x 8" landscape, applicable for white t-shirts only

Partners In Perfection

SureColor F-series Dye-sublimation Textile Printers

Available in 44" and 64" models, the SureColor F-series are large format textile printers with exceptional reliability and high quality output up to 720 x 1,440 dpi for industrial-level commercial production houses.
